Forward Looking Statements and Non-GAAP Financial Information

Forward Looking Statements: This presentation includes "forward-looking statements" within the meaning of the safe harbor provisions of the United States Private Securities Litigation Reform Act of 1995 related to dividends, our investment and portfolio strategy, investment returns, return on equity, liquidity and financing, taxes, our assets, our interest rate sensitivity, and our views on certain macroeconomic trends, among others. Forward-looking statements are based on estimates, projections, beliefs and assumptions of management of the Company at the time of such statements and are not guarantees of future performance. Forward-looking statements involve risks and uncertainties in predicting future results and conditions. Actual results could differ materially from those projected in these forward-looking statements due to a variety of factors, including, without limitation, changes in interest rates, changes in the yield curve, changes in prepayment rates, the availability and terms of financing, changes in the market value of our assets, general economic conditions, conditions in the market for Agency RMBS, Non-Agency RMBS, ABS and CMBS securities and loans, and legislative and regulatory changes that could adversely affect the business of the Company. Additional information concerning these and other risk factors are contained in the Company's filings with the Securities and Exchange Commission ("SEC"), including its most recent Annual Report on Form 10-K and subsequent filings. Copies are available free of charge on the SEC's website, <http://www.sec.gov>. All information in this presentation is as of May 2, 2018. The Company undertakes no duty to update any forward-looking statements to reflect any change in its expectations or any change in events, conditions or circumstances on which any such statement is based.

Non-GAAP Financial Information: In addition to the results presented in accordance with GAAP, this presentation includes certain non-GAAP financial results and financial metrics derived therefrom, which are calculated by including or excluding unconsolidated investments in affiliates, TBAs, and U.S. Treasuries, or by allocating non-investment portfolio related items based on their respective characteristics, as described in the footnotes. Our management believes that this non-GAAP financial information, when considered with our GAAP financials, provide supplemental information useful for investors in evaluating results of our operations. This presentation also contains Core Earnings, a non-GAAP financial measure. Our presentation of non-GAAP financial information may not be comparable to similarly-titled measures of other companies, who may use different calculations. This non-GAAP financial information should not be considered a substitute for, or superior to, the financial measures calculated in accordance with GAAP. Our GAAP financial results and the reconciliations from these results should be carefully evaluated.

Q1 2018 Performance and Highlights

- First Quarter 2018:
 - \$0.17 of Net Income/(Loss) per diluted common share⁵
 - \$0.59 of Core Earnings per diluted common share^{5,6}
 - Includes \$0.02 retrospective adjustment
 - Includes \$0.03 one-time positive impact from commercial loan payoff subsequent to quarter end
 - 0.9% economic return on equity for the quarter, 3.6% annualized⁷
 - \$19.32 book value per share⁵ as of March 31, 2018, inclusive of our current quarter \$0.475 common dividend
 - Book value decreased \$(0.30) or (1.5)% from last quarter, inclusive of:
 - \$(0.36) or (1.8)% due to our investments in Agency RMBS and associated derivative hedges
 - Increased interest rates and modest spread widening resulted in negative impact to book value
 - \$(0.05) or (0.3)% due to our Credit investments
 - Periodic bouts of equity market volatility had sector specific effects, but spreads overall were generally unchanged
 - \$0.11 or 0.6% due to core earnings above the \$0.475 dividend

Q1 2018 Performance and Highlights (cont'd)

- **\$3.8 billion investment portfolio as of March 31, 2018^{1,2}**
 - Net purchases of \$42.7 million of Agency and TBA securities, inclusive of unsettled trades, and net purchases of \$143.8 million of Credit Investments
- **2.69% Net Interest Margin (“NIM”) as of March 31, 2018⁸**
 - Increase in yield primarily due to the increase in interest rates and a commercial loan payoff subsequent to quarter end
 - Increase in cost of funds primarily due to an increase of 25 bps in the federal funds rate in March partially offset by repo spread tightening versus LIBOR
- **4.6x “At Risk” Leverage as of March 31, 2018⁹**
 - Increase in leverage primarily due to the addition of TBA securities

Note: The hypothetical Levered Returns on Equity ("ROE") depicted above are dependent on a variety of inputs and assumptions, which are assumed to be static, and do not reflect the impact of operating expenses. Actual results could differ materially based on a number of factors, including changes in interest rates, spreads, prepayments, asset values, funding levels, risk positions, hedging costs, expenses and other factors.

Quarter-Over-Quarter Snapshot

Footnotes

1. The investment portfolio at period end is calculated by summing the fair market value of our Agency RMBS, any long positions in TBAs, Residential Investments, Commercial Investments, and ABS Investments, including securities and mortgage loans owned through investments in affiliates, exclusive of AG Arc LLC. Our Credit Investments refer to our Residential Investments, Commercial Investments, and ABS Investments. Refer to footnote 5 for more information on the GAAP accounting for certain items included in our investment portfolio. The percentage of fair market value includes any net TBA positions and securities and mortgage loans owned through investments in affiliates and is exclusive of AG Arc LLC. See footnote 12 for further details on AG Arc LLC.
2. Generally, when we purchase a security and employ leverage, the security is included in our assets and the leverage is reflected in our liabilities on our consolidated balance sheet as either "Repurchase agreements" or "Securitized debt, at fair value." Throughout this presentation where we disclose our investment portfolio and the related repurchase agreements that finance it, we have presented this information inclusive of (i) unconsolidated ownership interests in affiliates that are accounted for under GAAP using the equity method and (ii) long positions in TBAs, which are accounted for as derivatives under GAAP. This presentation excludes investments through AG Arc LLC unless otherwise noted. This presentation of our investment portfolio is consistent with how our management evaluates the business, and we believe this presentation, when considered with the GAAP presentation, provides supplemental information useful for investors in evaluating our investment portfolio and financial condition. See footnote 12 for further details on AG Arc LLC.
3. The Company allocates its equity by investment using the fair market value of its investment portfolio, less any associated leverage, inclusive of any long TBA position (at cost). The Company allocates all non-investment portfolio related items based on their respective characteristics in order to sum to the Company's stockholders' equity per the consolidated balance sheets. The Company's equity allocation method is a non-GAAP methodology and may not be comparable to similarly titled measures or concepts of other companies, who may use different calculations.
4. The yield on our investment portfolio represents an effective interest rate, which utilizes all estimates of future cash flows and adjusts for actual prepayment and cash flow activity as of quarter-end. The yield on our investment portfolio during the quarter was calculated by annualizing interest income for the quarter and dividing by our daily weighted average investment portfolio. This calculation excludes cash held by the Company and excludes any net TBA position. The calculation of weighted average yield is weighted based on fair value.
5. Diluted per share figures are calculated using weighted average outstanding shares in accordance with GAAP. Per share figures are calculated using a denominator of all outstanding common shares including all shares granted to our Manager and our independent directors under our equity incentive plans as of quarter-end. Book value uses stockholders' equity less net proceeds of the Company's 8.25% Series A and 8.00% Series B Cumulative Redeemable Preferred Stock as the numerator.
6. Core Earnings are defined as net income available to common stockholders excluding both unrealized and realized gains/(losses) on the sale or termination of securities and the related tax expense/benefit or disposition expense, if any, and on such sale or termination, including investments held in affiliated entities and derivatives. Core Earnings includes earnings from AG Arc LLC. Earnings from AG Arc LLC were \$0.5 million in the first quarter of 2018. See page 21 for a reconciliation of GAAP net income to Core Earnings. See footnote 12 for further details on AG Arc LLC.
7. The economic return on equity for the quarter represents the change in book value per share from December 31, 2017 to March 31, 2018, plus the common dividends declared over that period, divided by book value per share as of December 31, 2017. The annualized economic return on equity is the quarterly return on equity multiplied by four.
8. Net interest margin is calculated by subtracting the weighted average cost of funds from the weighted average yield for the Company's investment portfolio, which excludes cash held by the Company. Net interest margin also excludes any net TBA position. See footnotes 4 and 10 for further detail.

Footnotes (cont.)

9. "At Risk" Leverage was calculated by dividing total financing including any net TBA position by our GAAP stockholders' equity at quarter-end. Our net TBA position (at cost) was \$143.7 million, \$102.5 million, \$121.6 million, \$310.5 million and \$93.4 million for the periods ending March 31, 2018, December 31, 2017, September 30, 2017, June 30, 2017 and March 31, 2017, respectively. Our average net TBA position (at cost) was \$20.1 million, \$66.5 million, and \$133.5 million for the years ending December 31, 2016, December 31, 2015, and December 31, 2014, respectively. Total financing at quarter-end, and when shown, daily weighted average total financing, includes repurchase agreements inclusive of repurchase agreements through affiliated entities, exclusive of any financing utilized through AG Arc LLC, plus the payable on all unsettled buys less the financing on all unsettled sells, securitized debt, and any net TBA position (at cost). Total financing excludes any repurchase agreements and unsettled trades on U.S. Treasuries.
10. The cost of funds during the quarter was calculated by annualizing the sum of our interest expense and net interest settlements on all derivative instruments and dividing that sum by our daily weighted average total financing for the period. Interest earning/paying derivative instruments may include interest rate swaps and U.S. Treasuries. The cost of funds at quarter-end was calculated as the sum of (i) the weighted average funding costs on total financing outstanding at quarter-end and (ii) the weighted average of the net pay rate on our interest rate swaps, the net receive rate on our Treasury long positions, the net pay rate on our Treasury short positions and the net receivable rate on our IO index derivatives, if any. Both elements of the cost of funds at quarter-end were weighted by the outstanding repurchase agreements and securitized debt outstanding at quarter-end, excluding repurchase agreements associated with U.S. Treasury positions. The cost of funds excludes any net TBA position.
11. The Company estimates duration based on third-party models. Different models and methodologies can produce different effective duration estimates for the same securities. We allocate the net duration by asset type based on the interest rate sensitivity. Duration includes any net TBA position. Duration does not include our equity interest in AG Arc LLC. Duration related to repurchase agreements is netted within its respective agency and credit line items.
12. The Company invests in Arc Home LLC through AG Arc LLC, one of its indirect subsidiaries.
13. "Leverage" in the heading of the chart on slide 7 for us refers to our "At Risk" Leverage. See footnote 9 for a description of our "At Risk" Leverage. For our peers, "Leverage" refers to the most comparable disclosed leverage for each peer for each period based on available financial information in the company earnings presentation or as filed with the SEC.
